

DENSION

New Product Introduction

New Part Number: **AVRG5B1** Dension A/V router for BMW.
Must use with GW51MO2 interface

Description of new product: Dension's Audio Video Router is a central control interface that works as an accessory with the GW500 and allows the driver to control audio and video sources in the vehicle from the factory fitted equipment.

NOTE: This product requires use of Gateway 500 interface to function.

Adaptor Function: The AV Router enables iPod video, DVD or any other visual source through the Audio video RCA input (e.g. games consoles, back-up cameras) to play through the original screen, or rear screen (when applicable), as well as controlling the connected audio sources.

Included with the product: (1) Audio Video Router accessory for Gateway 500 (GW51MO2)

Installation Notice: After installing the A/V router into a BMW vehicle, the vehicle must be taken to a BMW dealer to have the vehicle flashed to activate the "TV Tuner"

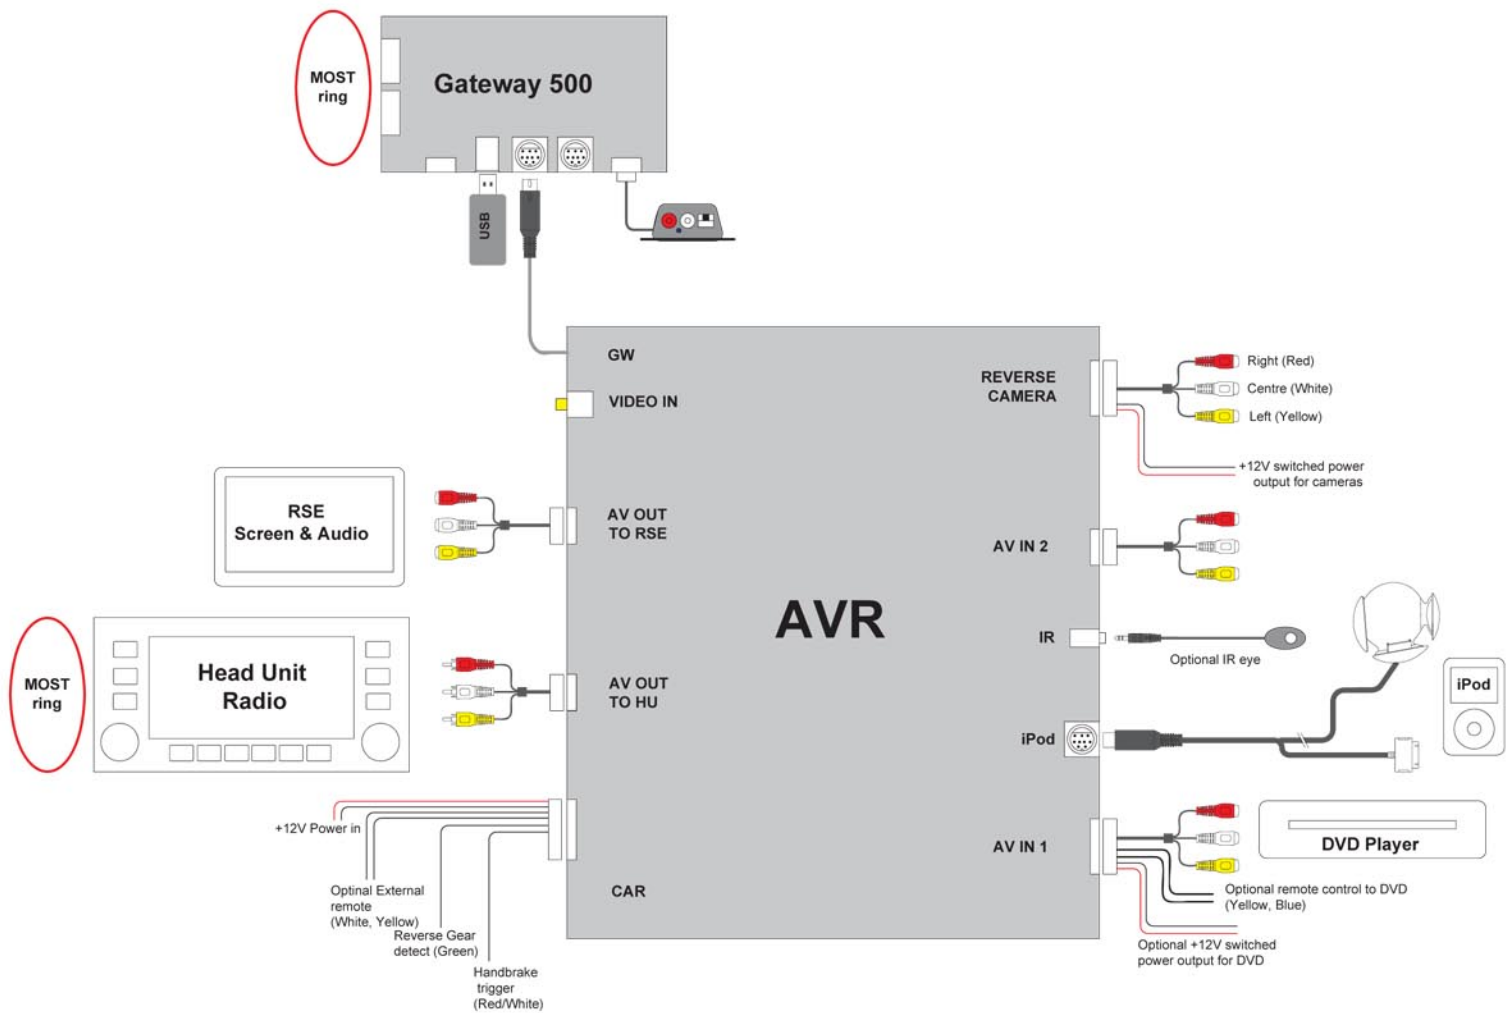

Compatibility: BMW Applications supported by GW51MO2

NOTE: this product REQUIRES Dension GW51MO2 (iPod / USB interface) to function in a vehicle.
