Add USB with Text, iPod with text and 3.5mm audio input to your factory radio

**GW33AC1  
GW33AC2**

**Audi CAN Quad-lock  
Audi CAN iso style**

**Description of new product:**

The Dension Gateway 300 is our standard USB solution for virtually any vehicle. Providing you with full iPod and USB control from your car's original radio, the simple aim is to provide iPod and USB integration without making unnecessary changes to your car's original equipment or dashboard. Choose an iPod cradle from our accessories section for an even neater installation, or simply have everything tucked away in your glove box.

**Functions:**

**Gateway 300 is essentially a Gateway 100 + USB input controllable through the radio**

- Full iPod control with text on factory radio and charging
- Full control of USB storage device with text on factory radio
- 3.5mm auxiliary input jack
- Retains OEM dashboard aesthetics
- Plug and play installation/de-installation. Perfect for leased vehicles
- Control of external devices through the OEM controls
- Song information and browsing on the OEM screen
- Wide range of accessories to extend functionality

**Included with the Product:**

- (1) Gateway 300 Module with USB and 3.5mm audio input**  
(iPod docking cable / cradle sold separately)
- (1) Vehicle specific plug and play harness**

**SOLD:SEPARATELY iPod docking cable / cradle is not provided with the Gateway 300! Sold separately !**
