

**Here are the Five by Five talking points on the features and benefits of our New PS Series Subwoofers.**

**Three new models, PS12, PS10 and PS8, Shipping Now.**

**Five Internal Features;**

- New amplifier – built from the ground up with better components delivering superior sonic performance
- A bigger woofer motor (magnet) with a stronger woofer basket
- Better voice coil
- Factory set EQ built-in to the amplifier for maximum woofer performance
- A Limiter to keep from over driving the PS subwoofers

**Five External Features;**

- Black Ash wood grain cabinet with contoured grill & chrome feet
- New treated paper cone woofer, beefier butyl surround & trim ring covering the woofers mounting hardware
- A slotted rear port – enabling the PS Series subs to produce deeper bass
- LFE connection – by-passes the PS crossover network to utilize the crossover from a surround receiver
- Left & Right Line Level inputs, Phase Switch, Frequency Adjustment and Volume Control
